**Subject:** 2016 water

My name is John Cecil , I'm 53 years old and lived my entire life in Glenn county. My family has lived and farm in northern ca since the late 1800. I farm over 2000 acres of rice and in GCID district. In 2011 I closed down my trucking division because of the ARB . Now in 2016 SWRCB are threatening are farming . This whole deal about the fish and the temperate of the water is just one more way to get rid of the California farmer, where is the common sense . There no way we can plant rice in June and have a crop to harvest.
